

# YAMUNA DENSONS Loadbreak Elbow Connector

25kV 200A for XLPE Insulated Cable

## YDLE25-200

### Features :

- Safe to touch
- Capacitive test point (Optional)
- Faster installation
- In-built stress control offering high stress control properties
- Unlimited shelf-life
- In compliance with IEEE 386/IEC-60502-4

The Yamuna Densons Loadbreak Elbow connector is fully shielded High quality peroxide-cured Insulating and Semi-conducting EPDM rubber end Insulated Plug-in Termination for connecting underground cable to transformers / switching cabinets / junctions equipped with Loadbreak bushings

Standard features/contents include a connector with optional capacitive test point, Tin-platted copper Loadbreak probe with an ablative arc-follower tip and SS rain forced pulling eye, Compression type center palm lug, Silicone grease, Mastic tape and Cold shrink sleeve.

### Technical Detail

| YDLE25-200            | Loadbreak Elbow Connector 25 kV 200A |              |
|-----------------------|--------------------------------------|--------------|
| <b>Power Function</b> | Voltage Class                        | 25kV         |
|                       | Current level                        | 200A         |
|                       | AC Voltage Withstand                 | 40kV AC/1min |
|                       | BIL                                  | 125kV        |
